Art Unit: 1711

DETAILED ACTION

The following is an examiner's statement of reasons for allowance: Crosslinkable compositions comprising blends of nitrile rubbers and epihalohydrin rubbers and various crosslinking agents are known in the art. See for example, US Patent 4,048,261 to Starmer (hereinafter "Starmer"); US Patent 3,657,393 to Komuro et al., (hereinafter "Komuro"); or JP 60-141739 to Fujikura Rubber Works (hereinafter "Fujikura"). All of those references disclose crosslinking the crosslinkable blends with one curing agent or a common curing system that crosslinks both the polymeric components. While use of mixtures of known curing agents, such as claimed in the instant application, would have been obvious, applicants demonstrated that the composition according to the present invention exhibit unexpectedly improved physical properties (permanent set and ozone resistance) as compared to the compositions having common curing systems.

Information Disclosure Statement

The IDS submitted by the applicants on February 3, 3005 has been considered, The applicants should note that the references submitted without English translation were only considered to the extent of their relevancy as indicated on the ISR accompanying the IDS.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
